**Subject:** RE: Danger Tree Contracting

Hi Holly,

See attached recent log extraction and haul contract. The entire project was completed without mentioning/requesting what type of equipment to use. Ideally I would like to see something similar, where work is done by the lump sum / project.

The following list of equipment could work. Possibly requesting work with a dairy rate and included a daily/weekly IAP. Similar to fire.

**Subject:** Danger Tree Contracting

Good morning,

I just met with Steve and Alan. So, I am attempting to close communication loops around the needs for the danger tree contract. Here is a basic list of the equipment needs:

2 harvesters

1 forwarder

2 rubber tire skidders

2 shovels

1 tong thrower /rubber tired yarder

Felling modules 2 pairs

It would be good to understand if all this equipment is available in existing IDIQs.
